

Status Modes

Waiting to be seated

After you log in and press the Play Now button, in case the server cannot join you to a game you will receive an option to select between “Wait” and “Pause Session”. If you want to play and in order to maximize the playing schedule, **please press “Wait”** and come to this screen:

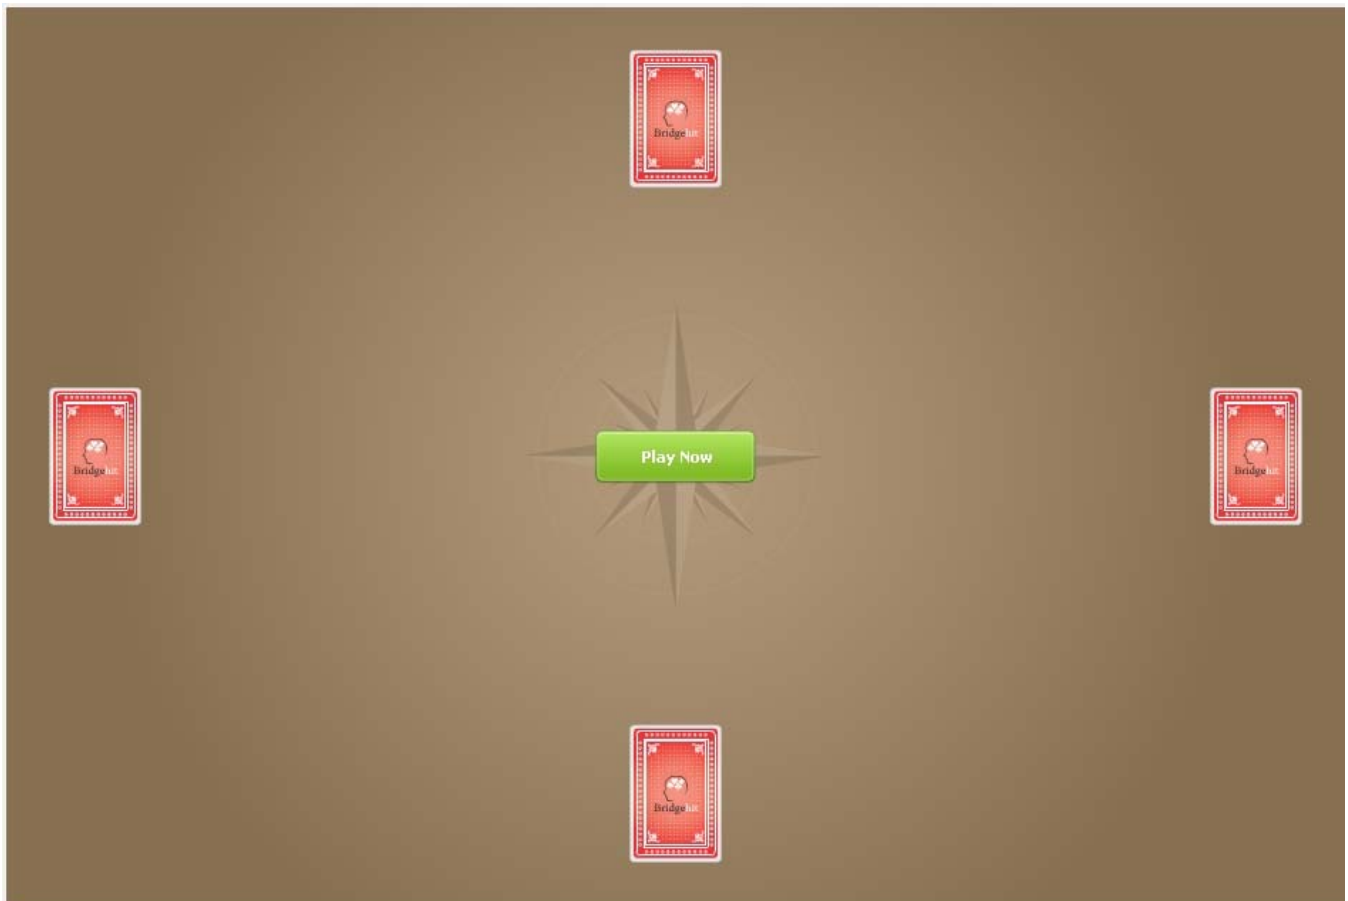

You will be given cards as soon as a table becomes feasible.

Note that if you have waited for a board you will be given priority in the seating!!!

Initial start screen

When you open the BridgeHit client you will be shown the following screen:

At this moment you are still not logged in! Press the “Play Now” button if you want to prompt the server to search for a board.

Note: in case you have already started a session and have paused it, the button sign will change to “Continue Session”.
